

RSI MODEL#: 70-36*-25
DOWN DISCHARGE ECONOMIZER
PATENT NUMBERS 5836814, 5938524, 6099405

The RSI Economizer is designed to on unit filter rack. All of the controls are wired and mounted and all of the damper linkage is installed. No field linkage adjustments are required. Wiring harness from the Economizer to the unit's low voltage compartment is provided, but must be field installed.

RSI control systems feature the new Honeywell Solid State control Actuators and Enthalpy control. The option for Differential (Dual) Enthalpy is also available. This will allow the use of either Return Air or Outside Air (whichever is coolest) to cool the space.
